

For School and District Customers

- Larger, higher resolution connector icons
 - to make your SSO connectors easier to read and more attractive
- An enhanced Catalog with larger logos
 - to make it easier and more attractive to discover new products in ed tech
 - Give [our Catalog](#) a look!
- Install the SSO Browser Plugin onto Chromebooks
 - to ensure that all SSO connectors will work for your Chromebook users
 - Review [this YouTube video](#) to learn how to install the plugin.
- Powerful new tools for API syncs (i.e., Power School & SIF Xpress Roster)
 - to detect duplicate records, to reconcile multiple data sources, to map attributes, and much more
 - contact our Support team to learn more and investigate on the “Users” tab, “Data Sync” page.
- Creation of custom SSO connectors in the UI
 - to help our Premium Passport customers quickly add new, simple connectors
 - Go to the Admin Console, “Resources” tab to give it a try. You should have the login URL and test credentials to the product with which you want to connect.
- Faster syncs with G Suite (AKA Google) domains
 - to support syncs with complex Organizational Unit structures with hundreds of OU nodes in the hierarchy
- Large-scale data uploads and syncs are up to 10x faster
 - to help large district and school authorities conveniently provide roster data
- Key Pair Authentication for SFTP uploads of CSV files
 - to make uploads of roster data easier and more easily updated
